M.S. Biostatistics and Data Science

M.S. Health Informatics

M.S. Health Policy and Economics

Certificate Programs

## Course Approval Form

Date: 28/05/2025

Student Name: Jing Lin

Academic Program: Biostatistics and Data Science

Term (include year): 2025 FALL

Requested Course to Omit: Hierarchal Modeling & Longitudinal Data Analysis

Requested Course to Substitute: The internship course

Rationale: This request is for approval to enroll in The Internship Course as part of my academic requirements. This valuable internship opportunity is with NYC Data Science Academy (<https://nycdatascience.com/>), where I will be working on AI-related projects from September 27th to December 9th.

I believe this internship provides an unparalleled opportunity to apply the theoretical knowledge gained in my BDS coursework to real-world data science challenges. It offers crucial practical experience in areas such as machine learning model development, data analysis, and potentially big data handling, all of which are essential for my professional growth in the field of Biostatistics/Data Science.
